Generation Success Partner Autodesk Launches Microgrants for Students Entering Construction Trades

Last month marked the fifth year of Autodesk's "[Make It Real](#)" program that cultivates student interest and builds workforce adaptability, particularly for those entering the construction trades. According to the company, one of the biggest barriers facing young people interested in trade careers is everyday expenses associated with job training, like tools, work clothes and boots, and transportation. To help with such costs, Autodesk announced \$50,000 of flexible microgrants, so that recipients can decide for themselves how to apply the funds where they are needed most. The \$500 individual microgrants are open to graduating high school seniors who are continuing their education in the building trades through apprenticeship programs or two-year vocational schools.
